

Truck Staging and Deliveries:

We would like to stress the importance of using the State designated truck routes whenever possible when hauling grain to Patriot Renewable Fuels LLC. Therefore we urge our customer to limit the use of 2900 Ave north of the Ethanol plant unless your farm is in a location that requires the use of the road.

Please note one amendment to our truck staging plans. *To start deliveries in the morning, no more than 1 truck should be staged in front of the scale, located in the NW corner of the facility, at any one time.* Throughout the day, no more than 2 trucks should be staged in front of the scales. Further staging will begin with the western-most truck slots, with trucks #3-4 parked one behind the other. Trucks should continue to stage in this manner throughout the lot. All vehicles must exit through the west outlet back onto Patriot Way. We will be on site to help everyone throughout the process.
